ABSTRACT

Systems and methods of selecting ~~mimetic~~ message settings ~~selection mimetically~~ on a messaging client ~~are provided.~~ ~~In one embodiment, w~~When an outgoing message is composed on a messaging client, the messaging client determines whether the outgoing message is related to a received message. Where the outgoing message is related to the received message, the messaging client determines the messaging settings used in the received message, and selects the messaging settings used in the received message to control message characteristics of the outgoing message.
